PROFILE SUMMARY

- Skilled Full Stack Developer proficient in ReactJS, JavaScript, Java, NodeJS, Laravel, HTML, CSS, and Bootstrap
- Operated within an Agile-driven development atmosphere, involving tasks like analyzing requirements, conducting research and development, formulating optimized solutions, coding, reviewing, performing unit testing, and managing deployment processes.

SKILLS

Front End Technologies: Javascript, React, Redux, Typescript, HTML, CSS, Bootstrap, Materail UI
Back End Technologies: Java, Spring, NodeJs, ExpressJS, RESTful Web services
Database Technologies: No SQL, MongoDB, SQL, Oracle, MySQL, Postgre SQL, JDBC.
Cloud Technologies: Azure, Google cloud platform, Google firebase, AWS.
Other tools: Eclipse, IntelliJ, Visual Studio Code, Oracle SQL Developer, GitLab, Git, Bitbucket, npm, JIRA

EXPERIENCE

Expresume

Software Developer (May 2023 - September 2023)

- Building the coded solution in React and collaborate with team members.
- Conducted comprehensive testing across various browsers to ensure optimal performance and compatibility
- Translated design mockups into functional HTML, JavaScript, and JSON structures, aligning closely with project requirements and utilizing Next.js features for efficient rendering.
- Implemented lightweight data validation techniques with frontend technologies within the Next.js framework, enhancing data integrity and user experience
- Facilitated team meetings to discuss project progress, challenges, and strategies for improvement, fostering effective communication and collaboration among team members.
- Generated and presented weekly reports summarizing project status, accomplishments, and key metrics to stakeholders, ensuring transparency and alignment with project objectives.

The One Web Technology

Full-stack web developer (April 2021 - July 2022)

- Created dynamic elements and web pages using React, JavaScript libraries, HTML, CSS, and Bootstrap.
- Managed and adapted data sourced from third-party APIs.
- Translated design mockups into functional HTML, JavaScript, and JSON structures
- Supported team efforts by testing code across various browsers
- Implemented lightweight data validation using HTML, CSS, JavaScript, and Bootstrap
- Engineered REST microservices utilizing Spring Boot and integrated them with Spring Cloud.
- Utilized Spring Core Dependency Injection and Annotations for efficient coding.
- Developed server-side programs in NODEJS to filter requests obtained through API calls
- Oversaw the application's builds and deployment on Heroku servers
- Strategized user stories and monitored issues and fixes within JIRA.

Project: Stock Market Web Application

- Created interactive elements and web pages using React, JavaScript libraries, HTML, CSS, and Bootstrap
- Integrated Firebase Cloud Database for data retrieval and storage.
- Utilized React JS components, Forms, Events, Keys, and Router functionalities
- Implemented a scalable database solution to broaden the target audience
- Successfully tackled complex bugs and issues encountered in both development and production stages

EDUCATION

Humber Institute of Technology and Advance Learning (Sept 2022-April 2024): Information Technology Solutions
Parul University (August 2017 -March 2021) B-Tech in Information communication Technology

CERTIFICATION

Google cloud platform (linuxworld)   **Crash course on Python**   **(Google) ReactJS (Udemy)**
